

610 Staticide® Anti-Fatigue ESD Mat

Comfort with ESD protection

ACL Anti-Fatigue ESD Mats are designed for workers that are required to stand for long periods of time without sacrificing static control. These mats offer cushioning and support to reduce fatigue and discomfort and promote productivity.

The vinyl material is inherently conductive so scratches and scuff marks will not affect the electrical properties which is crucial for environments where static control is imperative. The built-in grounding snap allows for any charges to go directly to ground once the cable is connected to the grounding system.

10' grounding cord

Maintenance:

To keep clean and avoid insulative electrical readings, use a neutral cleaner such as ACL's 4030 Neutral Cleaner. The low alcohol, high surfactant formula will clean deeply without damaging the structural integrity of the conductive material.

WARNING:

This product can expose you to chemicals including DI-ISONONYL PHTHALATE (DINP), which is known to the state of California to cause cancer. For more information, visit www.P65Warnings.ca.gov

Ideal for the following applications:

- Electronics manufacturing and assembly
- Aerospace and automotive
- Sensitive device and contract manufacturing
- EPAs and ESD-safe workbenches
- Transportation and packaging

FEATURES

- ✳ Resistance point-to-point measures $1 \times 10^5 - 1 \times 10^7$ ohms
- ✳ Dissipative cushioned under layer
- ✳ Smooth surface
- ✳ Beveled edges
- ✳ Equipped with 10mm female ground socket
- ✳ 10' grounding cord
- ✳ Made in USA
