

FOR IMMEDIATE RELEASE

ACL Staticide[®] Introduces New Knit ESD Gloves

**Guard Against Static Discharge
Ideal for Assembly and Inspection Work**

Chicago, IL February 2019 - ACL Staticide[®] introduces a new item to its ESD Workbench Product line. ACL's Knit ESD gloves protect against static discharge and are ideal for detailed assembly and inspection work. Washable and reusable, the gloves are offered with and without polyurethane fingertips.

Lightweight and seamless in construction, Knit ESD gloves provide a comfortable breathable fit with low moisture absorption. The micro-knit fingertips offer superb dexterity for working in ESD-sensitive areas.

Knit ESD Gloves: Model GLK and Model GLKT (with polyurethane fingertips) Made from blended nylon-conductive carbon yarn, the gloves are available in small to double extra-large sizes with color-coded wristbands for easy identification. They are packaged six pairs per pack (six packs per case).

[ACL Staticide[®]](#) has been a trusted supplier to electronics manufacturers for 50 years with products for the automotive, avionics, medical device, plastics and telecommunications industries. From highly regarded static control products designed for ESD-protected areas, to contamination control products for critical environments, to enhanced precision preparation products for PCB rework, repair and prototyping, ACL Staticide[®] is a worldwide leader. Recognized for performance, quality and innovation, ACL Staticide[®] complies with all domestic and international standards and regulations and stands behind its pledge to deliver only the best with every product.
