PRESS RELEASE

ACL Staticide® Introduces New Camouflage Wrist Strap Ideal for Electrostatic Protected Areas in Military Applications

ACL Staticide introduces fourth wrist strap to its ESD Wearables product line. The Camouflage Wrist Strap provides a safe path for eliminating static charges while blending in with military or defense motifs and attire.

The flexible, elastic crochet fabric with insulative outer lining and conductive inner lining ensures maximum wrist contact. Interwoven silver conductive fibers aid conductivity and minimize skin irritation.

Product # 8116 – Single Wire Wrist Strap

The adjustable Camouflage Wrist Strap features a 2mm thick band and a dissipative flip and grip buckle with a 4mm stud. RoHS compliant, it is compatible with ACL cords and sold in packs of six. When paired with wrist strap cords, the secure personal grounding system provides a snap release of one to five pounds of breakaway force. Highly effective for working on electronics in EPAs and sensitive military equipment, the system helps to ensure worker safety.

4mm Wrist Strap Cords

4mm-to-banana terminations – Product #8101, #8107 – include alligator clip
4mm-to-10mm terminations – Product #8103, #8109 – 10mm stud-snack snap

ACL Staticide has been a trusted supplier to electronics manufacturers for 50 years with products for the automotive, avionics, medical device, plastics and telecommunications industries. Recognized for quality and performance, ACL Staticide is a worldwide leader in static control, contamination control and chemicals for PCB rework and repair.
