ACL Introduces New PCB Rework and Repair Cleaning Product Line

ACL, Inc. announces the launch of a new line of aerosol products for PCB rework and repair. These products are made for the critical cleaning and degreasing of electronics, electrical assemblies, and sensitive components in the electronics market. Products include contact cleaners, electronic degreasers, flux removers, conformal coating, dusters and freeze sprays. ACL, Inc. offers several rinse cleaner/degreasers and flux removers available for specific applications.

Using high purity solvents and filling locally in the USA, these industrial staples offer quality performance at a value price-point usually reserved for larger quantities.

An ISO certified company, ACL, Inc. is known internationally as a manufacturer of static control products and for their trademark, Staticide[®]. Already a major supplier of support products for ESD-safe and electronics work areas, ACL, Inc. is suited to offer a line for the bench top. With brand recognition and a unique distribution network, ACL, Inc. is able to serve both small domestic suppliers and global distributor chains.
