**PRESS RELEASE**

**ACL Staticide® Introduces New ESD Wearable Products**

Ideal for Electrostatic Protected Areas

ACL Staticide® introduces four new products to its ESD Wearable line. All are suitable for working in Electrostatic Protected Areas (EPAs) and provide secure, comfortable and effective personal grounding.

**Wrist Straps:** Product #8111, #8113, #8115. These adjustable wrist straps provide a safe path for eliminating static charge. Available in three models – economy, premium and hypoallergenic – they can be used in both short- and long-term applications. All are RoHS compliant, compatible with ACL cords and sold in packs of six.

**Wrist Strap Cords:** 4mm-to-banana terminations – Product #8101, #8107. Wrist strap cords with alligator clip complete a secure personal grounding system for working on electronics in EPAs. Equipped with a 1-meg ohm resistor, they are sold in lightweight economy or heavy-duty premium. These 6-foot cords can withstand more than 100,000 cycles of flexing and provide a snap release of one to five pounds of breakaway force.

**Heel Grounders:** Product #8120, #8122. ACL's cup-style heel grounders provide a continuous path-to-ground between individuals and ESD-protected flooring. Offered in two models – economy and premium – both feature a 1-meg ohm resistor, conductive ground ribbon, rubber heel cups, adjustable straps, and hook and loop systems. Heel grounders are sold three pairs per pack.

**Disposable Heel Strap:** Product #8124. The disposable heel strap is an economical and convenient choice for plant visitors or temporary workers who need to access ESD-safe areas. Easy to apply, the heel strap makes contact with the individual's foot and the floor ensuring a continuous path-to-ground between the user and the floor. One-time-use heel straps are sold 100 per bag.

ACL Staticide® has been a trusted supplier to electronics manufacturers for 50 years with products for the automotive, avionics, medical device, plastics and telecommunications industries. Recognized for quality and performance, ACL Staticide® is a worldwide leader in static control, contamination control and chemicals for PCB rework and repair.
