PRESS RELEASE

ACL Introduces PL40 Premium Penetrating Lubricant

ACL introduces a universal lubricant-degreaser to its benchtop aerosol line for applications that require the loosening of frozen moving parts such as hinges, joints, and solenoids.

The PL40 Premium Penetrating Lubricant displaces moisture and inhibits corrosion on electronic and electrical components. The lubricating properties of this restorative formula reduce friction between mechanical parts for returning unusable metal parts back to functionality. Safe to use around plastics, the PL40 formula also provides protection against metal oxidation.
