PRESS RELEASE

ACL Introduces New Static Decay Product

By customer demand, the long lasting topical anti-stat, Staticide®, by ACL, Inc. is available as an aerosol spray.

Like all Staticide® topicals, the 2006 Staticide® Static Sentry is a humidity-independent anti-stat that decays a static charge to zero volts in less than 2 seconds, meeting Mil-B-81705 for static decay using Federal Test Standard 101B, method 4046. Other features include preventing tribogeneration and dust attraction.

Packaged in a special can, the Staticide® Static Sentry can operate at different angles to allow for horizontal spraying. It can be used on a variety of surfaces including laminate flooring, carpeting, fabrics, cabinetry, work surfaces, paper, polycarbonate, acrylic, PET, and glass. It is safe to use in manufacturing facilities for static control on carrying trays, keyboards, protective packaging, test equipment, smocks and ESD protective clothing.

The formula does not contain substances on the REACH SvHC list or in the RoHS Directive 2002/95/EC.
